PLUG & PLAY LIGHTING SYSTEM

IDEAL SOLUTION FOR INDOOR LIGHTING DESIGNS

The plug & play system is a flexible, fully pluggable, modular wiring connector and cabling solution to meet the lighting industry's need for a compact easy-to-install interconnect solution.

This 7.5mm connector can easily fit in an 8mm opening compared to other connectors that require much larger openings. The connector is ideal for applications where a power connection and coupling between lamps are needed.

Whether it's a large scale shop roll out or small individual units, Creative Retail Lighting are able to show you our value-added solutions to assist with LED lighting projects.

Our commitment is to design, manufacture and supply high quality, reliable LED lighting systems for a variety of sectors where lighting is required.

SEEING IS BELIEVING

Benefits

- The smart wiring solution, that can easily fit into smaller 8 mm openings for space saving
- Improves installation efficiency with a plug and play interconnection system
- Ready-made cable assemblies save valuable installation time and ensure high quality performance throughout the full lifetime
- Reliable and globally approved connector system (IEC and UL certified)
- Approvals: DIN EN IEC 60320 (VDE) UL 1977

Plug-and play principle. It's easy and reliable.

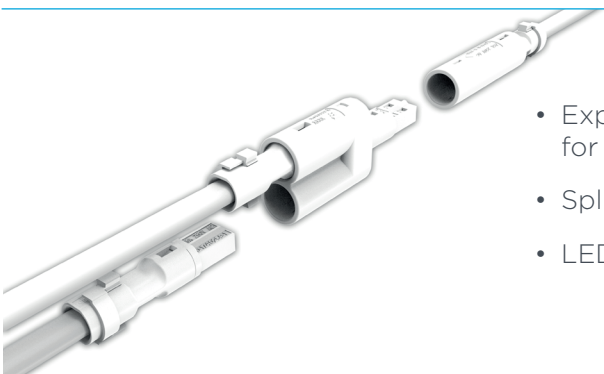

Easy. Fast. Compact.

It's our job to make connectors easy to use and fast to implement. The compact connector allows you to think freely with your design as its flexibility enables you to move fixtures around product displays for optimum lighting without worrying about any practical implications.

Ready-made Cable Assemblies

By offering pre-assembled cable systems, Creative Retail Lighting can take away all the hassle in the logistics and manufacturing of these products. Making sure that you can focus on your core competence of designing and delivering lighting equipment. We know the connector system in-and-out and have the right tools to provide you with highly reliable and efficiently produced cable assemblies. The portfolio consists out of the most common standard versions. Additionally, we can offer custom versions tuned to your project needs.

Our connectors can make your lighting visualizations a reality.

- Expand the power system and easily split power for two lamps
- Splitter has the function to switch power
- LEDs can be placed in the series using a Splitter

LIGHTING AS YOU IMAGINED IT

Flexible solutions with every design.

Just give us 8mm

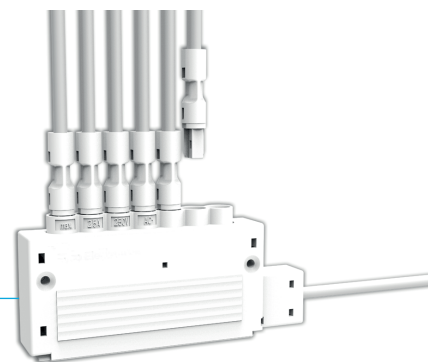

If you give us an opening as little as 8mm, the connector can fit there. You can power your lights just about anywhere: in a cabinet, inside kitchen furniture or in a headboard. The connector is easy to use, fast to implement and small enough to fit almost wherever.

It's the little things

The overall atmosphere of any interior lighting design can change because of a 7.5mm connector. Those few millimetres can give you unparalleled freedom to power your lights.

Whether it is 250V, 125V or a low voltage, the plug-and-play connector can expand a lighting system beyond its wall outlet.

- Six-way splitter to power six lamps

Small Connectors, Optimal Connectivity

Freedom in energy distribution

Less use of space, energy, and design equals better lighting installations.

With the development of LEDs, lighting fixtures are now smaller in size and the possibilities of lighting are expanding. The plug & play connector can power small fixtures that are designed to fit into almost any space.

What you see is what you get

Customers want to take a good look at the products they are about to purchase. Supermarkets and department stores pay close attention to their overall use of lighting to ensure that the products on their shelves are noticeable.

New systems are equipped with interior lighting that is optimized. Retrofitting an existing lighting system is a costly operation often not done unless other upgrades are needed.

PLUG & PLAY LIGHTING SYSTEM

Target Markets

- Electrical Installation
- Lighting Installation Applications

Applications

- Lighting
- Residential; kitchen and bathroom
- Retail; display, shelves, commercial refrigeration
- Horticulture; vertical farming
- Commercial Office; small spot lighting
- Ship and yacht electrical installation Specifications
Euro Style UL Style

Creative Retail Lighting carry high levels of stock with a wide range of LED profiles and accessories available off the shelf, our expert staff are on hand to guide you through the ranges that are available and can advise on the suitability of profiles and LED strips within your application, we can also give advice on suitable power supplies, dimming and colour control units to use within your installation. Give us a call to discuss your requirements.

For bespoke and custom lighting, Creative Retail Lighting offers a range of finished solutions, including profile cutting and assembly. Using our various plug & play LED connection systems, we can manufacture and assemble lighting in kit form to meet your exact requirements where off the shelf products don't meet your needs. Contact us to find out how we can help.
